In the short future (Additional USP's)

- Sharia approved platform for Africa
- Investor training program
- Opportunity to co-invest with local investors

What platforms are out there?

- Lendahand
- Trine
- Energizeafrica
- Thundafund

Challenges and learnings

Challenges & learnings

Crowdfunding Licence, regulatory aspect & Financial transactions

One of the major goals of regulation is the **protection of investors**. Because of this getting a licence in EU or US as an Kenyan entity will not be possible if Pangea do not have an entity in the area. The licence is needed for this aspects.

- To be allowed to conduct financial promotion
- To build an extra element of trust for our investors and potential investors.
- To be able to payment providers and smooth the process of transactions.

Crowdfunding campaign

- **More time**

To run a crowdfund campaign it's usually 30 day process (from established platforms). To consider the trustelement of our target group and also being a new player in the game. Our Campaigns will need more time to run their campaigns at the more time we are strengthening our brand.

Trust building

- **Trust x3** process need a closer relationships to the diaspora and this take more time than we expected but the roadmap we have in place is working.
